### DETAILED ACTION

1. Applicant's response filed on 06/02/2003 has been fully considered. Claim 1 is amended, claims 8-19 are added, and claims 1-19 are pending. All previous rejections have been withdrawn in view of Applicant's amendments and comments.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the extent of crosslinking of the ink absorbing layer not too high, does not reasonably provide enablement for the extent of crosslinking of the ink absorbing layer less than the extent of crosslinking of the ink transmitting layer. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. Page 7, line 24 of the specification recites for the extent of crosslinking of the ink absorbing layer not to be **too high**. In view of the specification, the extent of crosslinking of the ink absorbing layer is not necessarily less than the extent of crosslinking of the ink transmitting layer. It could mean that the extent of crosslinking of the ink absorbing layer is still higher than the extent of crosslinking of the ink transmitting layer but with a relatively small difference.
